GDSC WOW — GDSC WOW is a 3-day long virtual event consisting of 3 days of Speaker Sessions / Live Coding / Open-Source Projects webinars covering various topics of latest technologies and a Treasure Hunt game throughout the three days.

RESKILL X SPARKAR — It helps to create and share augmented reality experiences that reach billions of people using Facebook, Messenger and Instagram. By the help of this amazing platform, I have Designed an amazing filter for Facebook and Instagram.

Projects

BurgerHub

<https://github.com/kartik128900/BurgerHub>

BurgerHub, a burger ordering app inspired by fast-food giants like McDonald's, offers a user-friendly experience with a clean interface and seamless navigation. Built using HTML and CSS, the app allows users to customize their burgers with a variety of patties, toppings, sauces, and buns. The visually appealing design, crafted in Figma, ensures a modern and appetizing look.

AIR Jordan

<https://github.com/kartik128900/AirJordan>

I crafted an eye-catching and impactful cover page for an Air Jordan website, skillfully blending creativity and design expertise. Utilizing my proficiency in graphic design, I conceptualized a visually compelling introduction that effectively captures the essence of the iconic Air Jordan brand. The cover page showcases my ability to merge aesthetic appeal with brand representation, leaving a lasting first impression on users and contributing to an overall engaging online experience.

Starbucks_Coverpage

https://github.com/kartik128900/Starbucks_Coverpage

I designed and developed a visually appealing and responsive cover page for Starbucks using HTML and CSS, showcasing my proficiency in Frontend Development. This project demonstrates my ability to create engaging and interactive web content.
